PROFESSIONAL SUMMARY

Senior software engineer with 12+ years building and scaling production e-commerce platforms for brands in the US, Europe, Australia, New Zealand, and Singapore. Deep platform expertise across Shopify Plus and Salesforce Commerce Cloud, including six years supporting global Timex and Guess Watches storefronts. Strong in JavaScript and React/Next.js engineering, API and third-party integrations, platform migrations, and Core Web Vitals performance. Diagnoses complex production issues across code, apps, and platform settings. Works independently or in distributed teams, and uses AI coding tools (Claude Code, Codex) to move faster while owning code review, testing, and release quality.

CORE STRENGTHS

- Enterprise commerce: 6+ years on international Timex and Guess Watches storefronts (Shopify and Salesforce Commerce Cloud), a specialty few engineers have.
- Scale of delivery: 50+ Shopify and Shopify Plus stores built, migrated, integrated, or optimized across apparel, golf, furniture, gaming, and lifestyle brands.
- Performance without regressions: Core Web Vitals improvements shipped incrementally with regression testing to protect carts, filters, menus, and integrations.
- Remote delivery: 10+ years with clients and teams across time zones, from requirements and Figma handoff to launch and ongoing support.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), React, Next.js, PHP, Laravel, Python, Django, HTML5, CSS3/SASS, Tailwind CSS

Commerce Platforms: Shopify, Shopify Plus, Liquid, Shopify CLI, Salesforce Commerce Cloud, BigCommerce, WooCommerce, WordPress

Engineering: REST API and third-party integrations, platform migrations, performance optimization (Core Web Vitals), technical SEO, accessibility, debugging and root-cause analysis, cross-browser testing

Data & Tools: MySQL, Git, GitHub, GitLab, Bitbucket, Jira, Figma, Google Lighthouse, GTmetrix, Agile/Scrum

AI-Assisted Development: Claude Code, OpenAI Codex, ChatGPT, Google Antigravity for implementation, refactoring, debugging, and documentation, with all output reviewed and tested before release

PROFESSIONAL EXPERIENCE

Senior E-Commerce Engineer (Freelance) 2016 – Present

International Clients | Remote

- Engineered, migrated, and optimized 50+ Shopify and Shopify Plus stores, owning delivery from requirements and Figma handoff through Git-based development, launch, and post-release monitoring.
- Improved page speed on client stores through incremental releases and regression testing, protecting carts, filters, menus, and integrations.
- Resolved complex production issues as sole engineer for small businesses and within 3–5 person teams for mid-to-large clients, tracing root causes across theme code, JavaScript, app conflicts, and platform settings.
- Integrated and validated third-party systems including Klaviyo, preorder and back-in-stock apps, store locators, analytics, reviews, and marketing platforms.
- Led a full WooCommerce to BigCommerce migration for The Artisan Collective, including storefront rebuild, product and content transfer, and SEO preservation.
- Accelerated delivery with AI coding tools while personally reviewing, testing, and owning production outcomes.

Senior Systems Analyst, E-Commerce Jun 2018 – Dec 2024

TMX Philippines Inc. (Timex Group) | Cebu, Philippines

- Built and maintained production code for Timex and Guess Watches storefronts across international markets on Shopify and Salesforce Commerce Cloud, using JavaScript, Liquid, HTML5, and CSS3/SASS.

- Improved purchase journeys by refining product pages, navigation, content modules, and checkout-related interfaces with product, design, marketing, and QA teams.
- Used Lighthouse and GTmetrix to find bottlenecks, optimize front-end assets, and verify Core Web Vitals before deployment.
- Reduced recurring defects by documenting development procedures and standardizing quality checks within Agile/Scrum workflows in Jira.
- Retained for 6+ years supporting evolving commerce platforms and global business priorities.

Full Stack WordPress Developer Sep 2016 – Jun 2018

Monstar Lab Cebu, Inc. | *Cebu, Philippines*

- Built custom WordPress themes, plugins, and reusable templates with PHP, MySQL, JavaScript, HTML5, and CSS3.
- Developed the Yoshinoya website from the ground up and a responsive site for Nuat Thai Spa.

Full Stack WordPress Developer Mar 2015 – Mar 2016

Social Media Enterprise Pte. Ltd. | *Singapore*

- Developed and maintained WordPress and Laravel applications for multiple clients, covering front-end features, PHP functionality, database updates, and technical SEO.
- Managed website and server migrations with backups, DNS and hosting changes, and production validation to protect service continuity.

IT Administrator Mar 2014 – Mar 2015

Expressions International | *Singapore*

- Maintained the online store, advertising websites, and day-to-day IT operations; built HTML email templates for marketing campaigns.

SELECTED PROJECTS

- Malbon Golf / Buckets Club (Shopify Plus): Front-end enhancements, mobile improvements, performance work, and ongoing production support.
- Atomic Golf (Shopify): Migrated marketing content from Framer to Shopify; built reusable Liquid sections and responsive landing pages for faster campaign delivery.
- The Artisan Collective: WooCommerce to BigCommerce migration with SEO preservation and conversion-focused optimization.
- VoltDrive EV / GreenLoop Motors / ChargePath (personal projects): React, Next.js, and Tailwind CSS apps with comparison tools, location finders, and performance-conscious rendering.

EDUCATION

Bachelor of Science in Information Technology | University of Cebu – Banilad, Philippines | 2009
